

29.3 Beer-Quiche Game with Pooling PBE

Thursday, November 26, 2020 7:34 PM

$B^I B^W, N^B F^Q$ $q = 1/2$ B^I is BR, so is B^W what about $N^B F^Q$?

If I sees beer, $V_I(F) = -1p + 1(1-p)$
 $= -1/2 + 1/2 = 0$
 $V_I(N) = 0 \rightarrow N^B$ is a BR
 Is F^Q a BR? $-1r + 1(1-r) \geq 0$
 $r \leq 1/2$

PBE: $M^I M^W, N^B F^Q, q = 1/2, r \leq 1/2$

Consider $B^I Q^W, N^B F^Q$

B^I is a BR, $q = 1$, N^B is a BR

$r = 0$, F^Q is BR

Q^W ? $V_{II}(B) = 0 > 1 = V_{II}(Q) \rightarrow Nat$ is a BR

Any EQ w/ Q^I ?
 $Q^I Q^W, F^Q N^Q$
 $Q^I B^W, F^Q N^Q$
